## INSTRUCTIONS

Massage into the skin 1 to 4 times per day.

**ARNICA HYDROGEL** is a designated gel for muscles, tendons and joints. The advanced gel is quickly absorbed and penetrates deeply to support the recovery of muscles. It can be used before and after physical exertion for muscle and tendon support.

**Arnica Montana Flower Extract** - Support for bruising, soft tissue damage, muscular strains and sprains. Helpful for shock associated with injury or trauma. Arnica helps to aid recovery and can be used before and after strenuous exercise to help against stiffness.

**MSM** - Helps to reduce joint pain and stiffness. May help to support against inflammation. Supports faster recovery. Helps support against muscle damage and oxidative stress.

**Green Tea** - An antioxidant that helps to protect the body from the effects of free radicals. Anticarcinogenic, antibiotic, antibacterial, and antioxidant properties. Helps to boost the immune system.

**Witch Hazel** - Used to soothe sore muscles and bruising. Cooling to the skin.

**Glucosamine** - Easily absorbed into the skin, muscles & tendons. Supports against inflammation. Essential in the production of cartilage, joint fluid and supports the tendons and ligaments in horses

**Silica** - It has a role in supporting bone, tissues, cartilage, and healthy hooves.
