Horse and pony: add 40g to the feed daily or add 20g twice daily

Not suitable for foals

6 x 40g sachets = 6 supply days. (£10.16 per day)

LACTAPLUS is an advanced formula for muscle energy and recovery to deliver top performance for longer.

Lactaplus contains the latest innovative antioxidants like lipoic acid. During stress and hard exercise, the oxidation process speeds up producing an increase in free radicals which break down body cells. Lipoic acid is a potent nutrient that neutralises free radicals and protects the body's cells. Lipoic acid is fat and water soluble, therefore works throughout the entire body.

Other components like B vitamins in Lactaplus facilitate the biological reactions from which energy is harnessed. Delivering top performance for longer with quick recovery time.

When given before strenuous activity, Lactaplus ensures your horse's body has what it needs to perform and reduces lactic acid build up in muscle fibres.

The ingredients of this product are not listed on the FEI Clean Sport prohibited substance database list. Take into account the applicable rules of your federation during competitions

COMPOSITION
