

# Synovium® Mudcare

## INSTRUCTIONS

Clean the skin thoroughly. Apply the ointment to the skin in the desired places 2 to 3 times a day with clean hands. For a better effect, apply a clean bandage after application to keep the skin clean.

**250ml Tube**

**MUDCARE** contains a unique formula of sufficient sulfur and concentrated pure honey for optimum healing of the horses skin and damaged tissue. Sulfur has proven effects to support horses with wounds and skin conditions such as Mud fever.

Sulfur is present in all body tissues and is essential for healthy skin. Collagen synthesis, which is essential to the structure of the skin, strongly depends on the availability of sufficient sulfur with Synovium Mudcare provides.

Honey has been used since ancient times for healing because it has a low pH-value; bacteria cannot survive in an acid environment. Honey contains small amounts of enzymes that help maintain a healthy skin and combat conditions such as Mud fever in horses and promotes healthy healing of the skin.

Lanolin keeps the skin flexible and moisture proof. Our formula has been uniquely developed by our team of vets to provide something you can rely on time and time again. A nourishing ointment that every horse owners needs in their tack room.
