

Synovium® Neutravet

INSTRUCTIONS

Horse: add 3 pumps to the feed in the evening. For strenuous exercise add 1 extra.

Pony: add 1.5 pumps to the feed in the evening. For strenuous exercise add 0.5 extra.

5 Litre Tub with Pump Dispenser

NEUTRAVET neutralises lactic acid after exercise and helps build a buffer with citric acid metabolites in case of acidification. Neutravet can contribute to counteract the negative effects of the formation of lactic acid and muscle acidification and ensures a faster recovery.

The ingredients of this product are not listed on the FEI Clean Sport prohibited substance database list. Take into account the applicable rules of your federation during competitions

COMPOSITION

Per 100 ml
Sodium citrate 30.8 mg
Citric acid 10.3 mg
