RED & GOLD is a unique energy supplement for horses. Containing extra vitamins and minerals for deficiency in forage. Supporting optimal energy, performance, and immune health.

Red & Gold proves repeatedly to be the designated supplement of choice for horses with energy loss. The specific spur elements, whereas iron, are of profound value to the production of haemoglobin, which transports oxygen in the blood cell throughout the body.

Synoviums well thought-out formula of spur elements, B vitamins and Biotin in Red & Gold Energy Boost provides optimal performance when most needed.

The ingredients of this product are not listed on the FEI Clean Sport prohibited substance database list. Take into account the applicable rules of your federation during competitions
